OUR CABLING SYSTEM

Ships standard with 10' adjustable cables. Glass pendants are individually adjustable after installation for optimum composition. This is a major advantage compared to other drop pendant cabling systems that require cutting. Cables are hand adjustable by simply pushing up to shorten the length. To increase cable length, push plunger up and pull cable out.

CUSTOMIZATION

This collection has multiple canopy configurations. However, through Fine Art Handcrafted Lighting's Customization Program we can make canopies to your specification in size and in number of drops with supplied appropriate transformer capacity. Canopies can be customized in finish and shape, including a version that has been coated with a base primer for you to paint to match your home decor.
